

Definition:

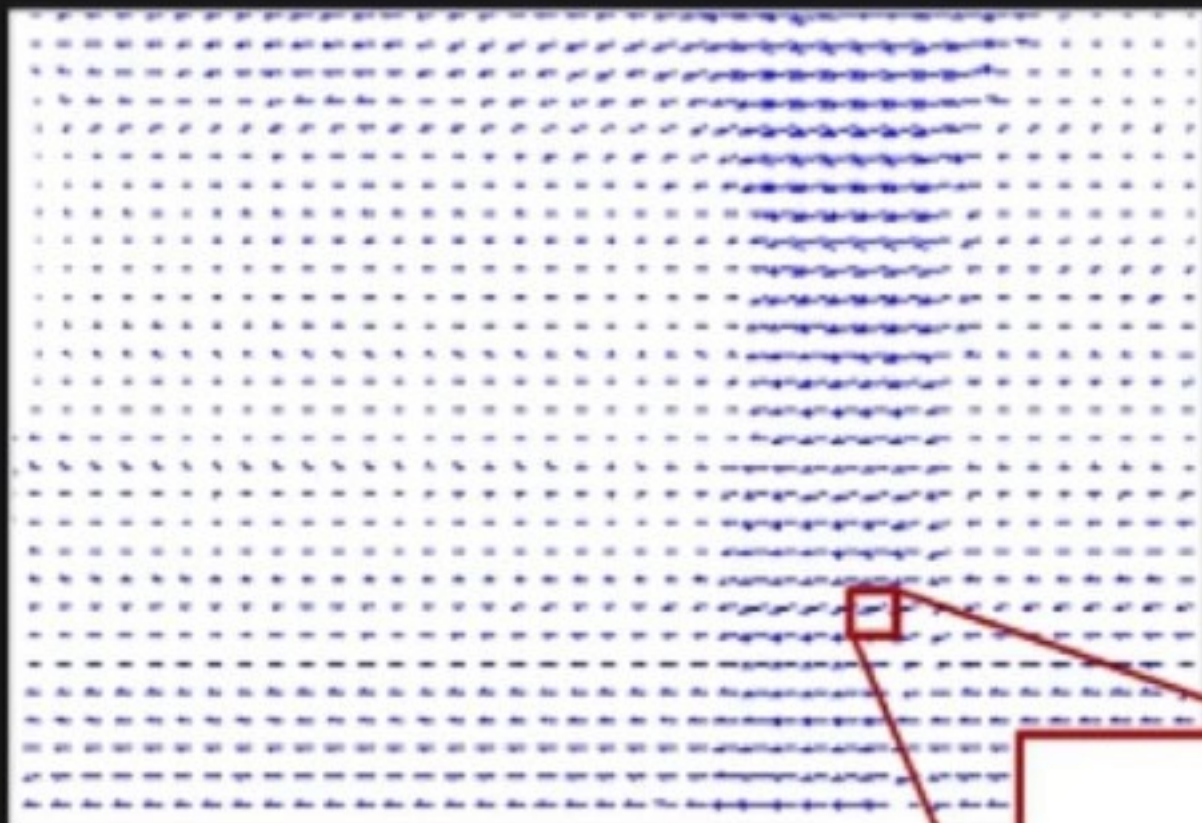

- Optical flow is the pattern of apparent motion of objects, surfaces, and edges in a visual scene caused by the relative motion between an observer and a scene.

- Optical flow can also be defined as the distribution of apparent velocities of movement of brightness pattern in an image.

- Optical flow is the pattern of apparent motion of objects, surfaces, and edges in a visual scene caused by the relative motion between an observer and a scene.
- Optical flow can also be defined as the distribution of apparent velocities of movement of brightness pattern in an image.

Optical Flow
